Spectrum Semiconductor Materials response to the COVID-19 Pandemic

The Global Pandemic and its effects continue to alter our operations. Here is an update to our response to the crisis:

1. We are respecting the mandates issued by local, state and federal health agencies. At this time the State of California has extended the Shelter in Place order through May 31, 2020.

2. The health and wellbeing of our employees, customers and vendors remains our top priority.

3. Due to our role in the Supply Chain of materials used by some of our customers and their roles in supporting the mission of the United States government we have been deemed an essential business.

4. Because of our desire to cooperate with our customers and vendors to keep the supply of needed materials flowing and in order to protect our employees, we are receiving parts and shipping them and on modified schedule. We will ship and receive orders every Tuesday and Friday until further notice.

5. In order to comply with Social Distancing recommendations, we have only a minimum number of employees on the premises at any time. We are keeping the recommended distance of 6’ apart when preparing parts for shipment.

We appreciate the patience and cooperation of all our customers and vendors during these extraordinary circumstances. As soon as we are given the permission to return to full staffing, we anticipate an immediate return to our normal shipment schedules.

We thank you for your continued business and we will do our best to support your needs in the timeliest way possible. Stay safe!

Warmest regards,

Steven Ochoa
President
Spectrum Semiconductor Materials, Inc.
